Mintons

This new collection of porcelain tiles recalls the piece by piece work, in which the artisan obtained the chosen colors by mixing marble powder, cement, sand and pigments. Each color was poured into its corresponding mould, called “tropa”, thus achieving the chromatic combination. Therefore, Mintons is characterized by its versatility and variety of designs and colors. Moreover, thanks to the evolution of the manufacturing techniques, these tiles are still a clear example of resistance and endurance, suitable for both indoor and outdoor spaces.
